-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 26 February 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Response to Amendment

1. This action is in response to the amendment filed 2/26/07. Claims 1-6, 10-11, 13-15 have been amended. The abstract has also been amended.

Response to Arguments

2. Applicant's arguments with respect to claims 1-15 have been considered but are not persuasive. Applicant's amendments have necessitated a new search and new grounds of rejection.

Specification

3. The amendment filed 2/26/07 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: "where the first link is continually discarded" (Abstract). Whereas the originally filed abstract discloses that "an access point ... **once** discards the link" (line 13), it does not disclose **continually** discarding the link.

Applicant is required to cancel the new matter in the reply to this Office Action.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 1-15 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 1 recites the limitation "continually discarding the link at said link discarding step" (lines 16-17). Whereas the originally filed specification discloses discarding the first link, it does not disclose **continually** discarding the link. Claims 2, 11 and 13-15 are rejected on the same basis as claim 1. Claims that are not specifically addressed are rejected by virtue of their dependency.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the

subject matter which applicant regards as the invention. Claim 1 recites the limitation "continually discarding the link at said link discarding step" (lines 16-17). A communication link is disclosed in the specification as a communication session established between two devices. Discarding a communication session is a one-time event, and once a communication session is discarded, it is gone. It is not clear how to continually discard a link after it has been discarded. Claims 2, 11 and 13-15 are rejected on the same basis as claim 1. Claims that are not specifically addressed are rejected by virtue of their dependency. For prior-art rejections, the limitation will not be considered.

Claim Rejections - 35 USC § 102

8. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

9. Claims 1-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Lewis (6,526,506). Lewis discloses a method and system for key

updating in a wireless network comprising at least one access point and multiple clients (fig. 1, elements 60 and 90).

Regarding claims 1-2 and 6-15, Lewis discloses that an encryption key shared between an access point and a client in a wireless system is changed periodically. Lewis further discloses that the access point establishes a first encrypted communication with and sends a new shared key to the client, the new shared key being encrypted using a current shared key (i.e., the key that is currently shared between the access point and the client). The new shared key replaces the current shared key and is used for authentication and encryption in subsequent communication between the client and the access point (fig. 1; col. 12, line 36 – col. 13, line 12).

Regarding claims 3-5, Lewis further discloses that the access point connects to multiple clients but the new shared key is only sent to certain clients (col. 13, line 66 – col. 14, line 15).

Conclusion

10. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
